

Fall Prevention Referral Service

Concierge Care recognizes the importance of fall prevention and has developed referral services to help reduce the chances of injury.

Understanding Fall Risks in Older Adults

- Falls are the leading cause of injury for adults ages 65 years and older.
- 1 in 4 older adults falls each year, but less than half talk to their healthcare providers about it.
- Many who fall develop a fear of falling. This may limit their activities, which leads to reduced mobility & loss of physical fitness, and in turn increases their actual risk of falling.
- Older adult falls are common, costly, and preventable.

How Our Process Works

Step 1:

Complimentary Assessment

A Concierge Care Senior Care Advisor does a complimentary client-driven needs assessment to increase safety and reduce risk of repeat falls.

Step 2:

Plan of Care

A client-driven care plan is developed to provide the highest level of safety

Step 3:

Caregiver Referrals

A caregiver is carefully referred based on the needs assessment
