

Personalized *care*

Concierge Care is a Nurse Registry and has been providing caregiver referrals for more than 15 years. We are passionate about helping our clients receive the care they need in the home they love. The process begins with a complimentary in-home assessment conducted by a highly qualified Senior Care Advisor, who will assist you in building a client-directed care plan. This plan can be tailored to help the caregiver understand your physical, mental, and social needs during their visits.

Once this step is complete, you will be able to select your caregiver from a network of carefully chosen individuals with the skills and training that best meet your needs and lifestyle. Our commitment is to refer only the very best caregivers to you. Not only is every independent contractor required to complete a state-mandated background screening, but they must also meet the highest standards set by our company. Additionally, we verify that their credentials meet all state requirements. Last, but certainly not least, all caregivers are covered by professional liability and workers' compensation insurance.

Care options may include:

- Personal care: bathing, hygiene, dressing, hair care, and incontinence care
- Medication reminders and support with prescribed exercise
- Meal planning, preparation, and nutritional assistance
- Mobility support: transfers and walking assistance
- Light housekeeping, laundry, and home organization
- Transportation to appointments and errands
- Calendar management and appointment scheduling
- Encouragement of hobbies, socialization, and meaningful activities

Let our family help find care for yours
