Post-Surgical Care Referral Services

Concierge Care's Post-Surgical Care is designed especially for anyone needing help after an operation.

- **Complimentary Assessment -** One of our dedicated Employees will assist you in developing a Client-Driven Plan of Care that the referred caregiver will follow.
- **Engagement** -A chance for the patient and family to meet with referred caregiver to reduce any anxiety and building confidence in the capabilities of the caregiver.
- **Transportation**- The referred caregiver can provide safe transportation services from Hospital to home upon discharge. Then provide any transportation to any follow-up MD appointments, prescription pickup's, or daily errand needs.
- **Fall Prevention -** Having the referred caregiver's assistance with daily living needs greatly reduces the risk of a fall and re-injury.
- **Exercising**- The referred caregiver can assist the patient with daily exercise as recommended by the Physical Therapist or as desired.
- **Medication Reminders**- The referred caregiver will provide medication reminders to the patient. The caregiver can implement the importance of encouraging compliance of prescribed medications.
- **Patient Satisfaction** - We have live 24/7 on-call team dedicated to answering the phone.
- **Documentation** - Through the use of our online "Family Room portal" the referred caregiver can log any changes in status. This way the family can always be aware of what's going on when the caregiver visits.
